Propane Ford Transit Van
Propane Ford F-150
Propane Ford SUV

28 Drivers

Did the demo help the decision to buy alternative fuel vehicles?

The Demo provided good exposure to an alternative fuel source for the daily transportation of students.

Perceived barriers to alternative fuels?

Drivers were pleased by all aspects of the vehicles and see funding as the only barrier to their integration on campus.

"Overall, drivers were positive about the use of the demo vehicles and feel that the university would consider propane shuttles in the future if funding is available for the costs of conversions and fueling infrastructure."

-John Ridout,
Transportation Coordinator

What is SADI?

The Southeast Alternative Demonstration Initiative (SADI), is a US Department of Energy project focused on the increased adoption of Alternative Fuels in the Southeast region of the United States. In March 2017, the Land of Sky Regional Council worked with technology partners to provide opportunities for propane fleets to demonstrate a wide range of alternative fuel vehicles.
